

CostSaving ABI3500

Lower the running costs of your DNA sequencer

**ABI 3500 /
ABI 3500xl**

Upgrade your system to Windows 7 and save on reagents at the same time!

OUR OFFER INCLUDES

- » New data analysis computer: Windows 7 license, installation of Data Collection and analysis software, transfer of your user settings
- » Preventive maintenance of your instrument including the operational and process qualification (OQ/PQ) and instrument performance verification (IPV)
- » User training focused on how to minimize running costs of DNA sequencing and fragment analysis
- » Labour and travel costs of service engineer

**NO NEED TO BUY ADDITIONAL SOFTWARE LICENSES,
KEEP ON USING YOUR CURRENT ONES!**

The offer is valid for ABI 3500/3500xl sequencers only, with DataCollection v1.0 or 2.0 and includes delivery of the new data analysis PC with Windows 7 and installation of data collection and analysis software (DataCollection 3.1 and any version of Sequencing Analysis, GeneMapper, SeqScape / Variant Reporter). This new PC is put into operation during first regular inspection and is covered by 2-years warranty. Apart from Windows 7 this offer does not cover any additional software licenses.
